

Plate Heat Exchangers

A division of SCES Limited

'Providing expert solutions to the problem of separation'

Centrifuges Unlimited offer a wide range of centrifugal and thermal equipment together with an extensive range of spares and second user refurbished equipment to OEM quality.

In keeping with the Centrifuges tradition, plate size and number can be modified to deal with different flow rates, physical properties, pressure and temperature, allowing us to customise the product to the customers needs.

Solid and robust construction, the hard wearing titanium plates, sealed by high endurance rubber gaskets, direct the fluids into alternating channels.

Benefits of the PHE

- High thermal efficiency
- Low installation costs
- Low maintenance
- Environmentally efficient

Specifications

- Size mm outer frame 1100 x 2200 x 1950
- Weight 2.5 tonnes

Scope of use

- Marine engine room applications
- Drilling mud cooling
- Heating and cooling of any industrial fluids

Capacities

- Volumes dependant on application

Centrifuges Unlimited Services

- Maintenance
- Sales and rentals
- Construction to buyers specification
- Installation
